Disclaimer

The data, statements and information presented in this report is for informational purposes only, and it does not constitute financial or investment advice. Further, the financial statements presented have not undergone a comprehensive financial statement audit from a third-party professional accounting firm. As such, there may exist errors or inaccuracies that materially misstate the financial statements. We are not responsible for any financial losses or adverse outcomes that may result from making investment decision based on the data presented herein. Further, by viewing this report you agree that the statements in this report do not constitute a representation, warranty or guaranty regarding any matter, and you are not relying thereon, but will conduct your own due diligence. You hereby release, waive and relinquish any and all claims, causes of action and disputes against Gitcoin, its contributors, and the creators of this document. THIS REPORT DOES NOT CONSTITUTE ADVICE FOR ANY PURPOSE. The forward-looking statements in this report are subject to numerous assumptions, risks and uncertainties which are subject to change over time. There are many risk factors, including those relating to blockchain and cryptographic technology generally, as well as Gitcoin specifically, that could cause actual results or developments anticipated by us not to be realized or, even if substantially realized, to fail to achieve any or all of the benefits that could be expected therefrom. We reserve the right to change the plans, expectations and intentions stated herein at any time, and we undertake no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future developments or otherwise. ACCORDINGLY, WE RECOMMEND THAT YOU DO NOT RELY ON, AND DO NOT MAKE ANY FINANCIAL DECISION OR INVESTMENT BASED ON, THE STATEMENTS CONTAINED IN THIS UPDATE

Mission

“Gitcoin is the community of builders, creators, and protocols at the center of open web ecosystems”

GITCOIN

What is GTC?

The DAO is the vessel for Gitcoin’s mission. It consists of community members coordinating to fund public goods, and introduces the Gitcoin token (GTC) to make decisions about where to allocate resources.

GTC is a governance token for credibly neutral developer talent and public goods funding, and the means to progressively decentralize the Gitcoin platform through the GitcoinDAO.

Gitcoin’s DAO oversees the community treasury of GTC tokens, along with offering a governance framework for delegates (called Gitcoin Stewards) to participate in key ecosystem decisions such as fund allocation, matching pools, and grant collusion.

GTC is a fork of the COMP/UNI governance systems, built with a delegation prompt integrated into the retroactive claim process. With the aim to establish the DAO ecosystem with higher voter turnout than any blockchain-based governance system in the past.

The goal is to gradually introduce more formal frameworks for the ongoing development and maintenance of Gitcoin, as managed through on-chain voting.

Key Financial Highlights - May

Contributor Rewards

\$380k Down 5.7% MoM

The organization has recently gone through a new season of proposals (\$14). This has brought about more challenges with respect to contributor rewards. April did not see the payment of Public Goods rewards which caused a reduction in April to the comparatively high March rewards. In May, no payment was made for the Moonshot Collective since it was made just after month end. This has contributed towards the reduction in May.

GTC Token Outflow

103k Up 16.6% MoM

GTC token distribution is up from April. This is largely a result of further depreciating GTC token price. As a result, rewards denominated in USD require a greater amount of GTC to be distributed to satisfy the same dollar value.

Total Treasury Balance

\$98.5m Up 144% MoM

The Gitcoin treasury has grown significantly since April. This is a result of ~19M GTC being claimed from the vester account. The vester account is not tracked within this report since the tokens within it are time locked and not yet liquid.

Stablecoin Token Outflow

\$25.5k Up 239% MoM

Stablecoin outflows fluctuate month on month depending on how contributor rewards are settled (either in GTC or stablecoins).
